

Wilson Bott Testimonial for Informanagement – April 2021

We began working with Informanagement in early 2013. The regular client newsletters, news items on both the website and Linked In and the resources section of the website are well-liked and used by our clients. The continuous flow of information and updating of our website with minimal input from our team keeps clients informed whilst allowing me and the Wilson Bott team to focus on our day-to-day work. The services provided by Informanagement have really boosted the profile of the business. During 2020, the additional COVID information was very popular with our clients.

The Informanagement team always respond promptly to any requests from us and always remind us when we need to do something.
